- 100 Days of SwiftUI
- Santander Bootcamp 2023 - Mobile iOS com Swift

Summary

iOS Developer with senior-level expertise in Swift, SwiftUI, and UIKit, transitioning from a backend background. Delivered high-impact features for the Porto Seguro app, serving millions of insurance customers, and built a real-time grocery list in PossoComer that supported up to four concurrent users. Revamped UI and eliminated critical crashes in GymWP, achieving 99.9% crash-free sessions. Seeking to apply deep mobile development experience to drive user-centric, high-quality iOS solutions.

Experience

WeFit - Digital Service Design

Jun 2025 - Present

iOS Developer

São Paulo, Brazil

Working on the Porto Seguro app, a core digital platform for one of Brazil's largest and most recognized insurance companies. My role contributes directly to the user experience for millions of clients, supporting the company's leading position in the auto insurance segment.

Leal Apps

Oct 2024 - May 2025

iOS Developer

Belo Horizonte, Minas Gerais, Brazil

Career switch to iOS development! Worked on two apps: PossoComer and GymWP. PossoComer: Worked on new features including a real time grocery list (shared through deep linking) which held up to 4 users simultaneously. GymWP: Worked closely with the design team on revamping older screens to more modern layouts, fixed long lasting bugs that increased the Firebase Crashlytics metric to 99,9% users without failure and discovered + created the solution to a CloudKit and watchOS error. Stack in both: Swift, UIKit, Combine, Core Data and Firebase

WEX

Aug 2023 - Oct 2024

Software Developer

I worked as a senior software engineer, decoupling applications from a legacy application in a multicultural team. Helped building and maintaining tools in C#/.NET that helped the team in the decoupling process.

Symplicity Brazil

Sep 2022 - Jun 2023

.NET Developer

I worked as a .NET developer on the outcomecampusconnect.ca project. I worked developing new features and performing tests.

dti digital

Aug 2018 - Dec 2021

Developer

Belo Horizonte e Região, Brasil

I worked on three projects during the three-year period at the company: I developed a pricing system for MRV Engenharia projects, called MRV Prices. An API was developed using .NET Core and Angular to develop FrontEnd screens. I developed a virtual contract signing system, using .NET Core and DocuSign. I supported a system that acquires land for MRV Engenharia, using .NET Core and reactjs

PUC Minas

Feb 2018 - Jun 2018

Calculus 1 Teacher

Belo Horizonte

I worked giving support to the students of the Software Engineering course who attended the calculus 1 and 2 courses
